Randolph Building
401 Dulany Street
Alexandria, VA 22314

Sir:

This is in response to the USPTO Notification dated May 10, 2010, stating that the sequence listing submitted February 22, 2010 could not be accepted due to errors. Attached is a copy of the Sequence Listing in computer readable form correcting the errors in accordance with the instructions of the reviewer, Mark Spencer, in the Notice to Comply dated January 20, 2010. In generating the attached copy of the "Sequence Listing" in computer readable form, Applicants noted a typographical error in the 13th amino acid abbreviation of sequence 6. In order so as to have the sequence listing accepted by the software application, Checker ver. 4.4.0, Applicants corrected the erroneous abbreviation "Lle" to properly recite "Ile" which is the correct abbreviation for isoleucine. Other than the correction of the typographical error, the attached copy of the "Sequence Listing" in computer readable form is identical to the written sequence listing and includes no new matter, as required by 37 CFR 1.821(e), 1.821(f), 1.821(g), 1.825(b), or 1.825(d).

After reviewing the page count of the specification and drawings, it is determined that Applicants have not exceeded 100 pages.

In view of the foregoing remarks, Applicants respectfully request that all the objections be removed and that the application pass to examination. If, for any reason, the Examiner disagrees, please call the undersigned at 202-861-1629 in an effort to resolve any matter still outstanding before issuing another action. The undersigned is confident that any issue which might remain can readily be worked out by telephone.

Please charge any fee deficiencies or credit any overpayments to Deposit Account No. 504581 with reference to our Docket No. 41586.0013.

Respectfully submitted,
BAKER & HOSTETLER LLP

Michael D. Graham
